Job Sheet MT603-JS2

UNITED STATES DEPARTMENT OF AGRICULTURE
NATURAL RESOURCES CONSERVATION SERVICE

MT-ECS-603-2
06/2002

SITE PREPARATION

Provide a firm, weed free seedbed that ensures proper germination. A firm seedbed is one that allows an average sized man to sink 1/8 to 1/4 inch into the soil.

PLANTING METHODS

1. Drill seed _____ inches deep uniformly down the row. Plant according to seeding rate listed above. If necessary, mulch newly seeded area with _____ tons per acre of _____ (mulch material). If a companion crop is seeded, plant at the rate of _____ pounds per acre, but clip or harvest before it heads out.
2. If seedlings are used, adjust column labels according in above table.

OPERATION AND MAINTENANCE

- > Herbaceous wind barriers must be inspected periodically to assure no voids develop in the protective rows of vegetation.
- > Shape and replant blowouts and void areas as necessary to maintain barrier porosity.
- > Control spreading of barrier plants into cropped areas.
- > Controls weeds and fertilize to maintain plant vigor.
- > Control grazing and equipment traffic as necessary to protect barriers.
- > Additional Maintenance: _____
